

# Geo-modelling for Geomonitoring: technologies and training of specialists

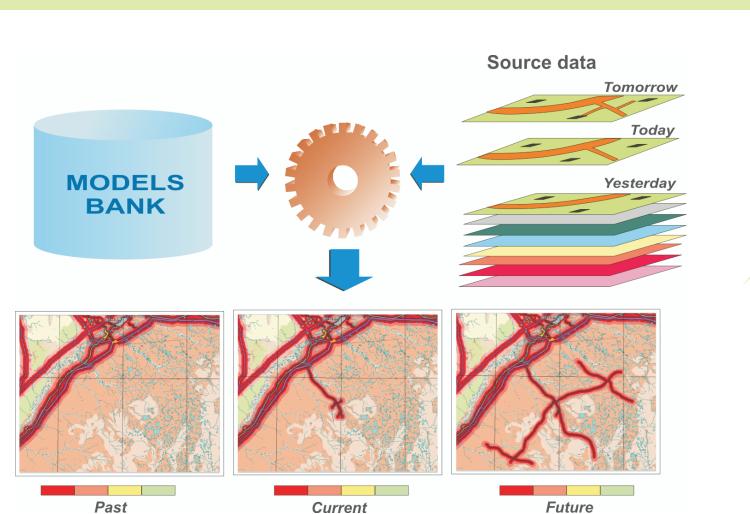

Dr. Anna Lyubimova

Laboratory of Geoinformatics, VNIIGEOSYSTEM  
Moscow, RUSSIA

## Technological support

Assessment of natural hazards and technogenic risks, analysis of ecological conditions and industrial impacts, estimation of damage caused to ecology

**Target groups:**  
Business companies and scientific organizations

**Benefits:**

- tools for data integration and processing
- analytical support of the decision-making process
- visual demonstration of ecological changes in the future

## Training course

Theory and practice of computer-based modelling of environmental situations using desk-top and web GIS-applications

**Target groups:**  
Universities and professional development departments

**Benefits:**

- deep understanding of spatial modelling process
- experience in GIS application to the monitoring problems
- combination of engineering skills and thematic knowledge

**Laboratory of Geoinformatics, VNIIGeosystem**  
Varshavskoye chaussee, 8, Moscow, 117105, Russia
