Other Site Characteristics

Il Podere Pantaleone è un antico sito rurale di pianura evoluto a bosco dalla spontanea rinaturalizzazione di un'antica piantata di vite maritata a pioppi ed acero campestre. Ormai la componente arborea ha preso il sopravvento sugli incolti ex seminativi tra un filare e l'altro, e l'insieme compatto di bosco e margini rinselvatichiti, prati mantenuti all'interno e un piccolo stagno, costituiscono un insieme di natura rigogliosa in un contesto fortemente antropizzato di coltivi e margini urbani del centro di Bagnacavallo.

4.2 Quality and importance

Oltre alla pregevole diffusione e riproduzione per *Osmoderma eremita*, il sito si qualifica per crescente presenza di avifauna. Il tritone nello stagno completa un quadro faunistico interessante, mentre gli habitat vegetazionali, indicati in maniera ottimistica, sono in realtà prodromici di uno stadio evolutivo non del tutto conseguito.
